

Our Team

Name: **Mrs. Anusuya Das Biswas** (*Founder-Director of SafeU*)

Background:

- i. An entrepreneur with extraordinary vision and decades of demonstrated diligence towards safe and sustainable agriculture.
- ii. Her master's degree in Environmental Sciences has not been for mere academic pursuit, but for her true passion towards the subject.
- iii. She has developed a deep understanding the "original science" of one of the most fascinating creations of Mother Nature – the plant physiology.
- iv. She has spearheaded, as a Director of IORF, the production facilities of the all-important 'energy solutions' that form the building blocks of the IRF Technology.
- v. SafeU is a direct result of her unadulterated mission of bringing the unique pathways that emerged from IRF Technologies over the last almost two and a half decades (a journey in which she had been a most influential co-traveller from the very inception) to reach the people who need them the most, through robustly scaled models.
- vi. She leads the co-ordination between SafeU and IORF.

Name: Mr. Triptendu Das (*Director of SafeU*)

Background:

- i. An alumnus of IIM Calcutta, with more than two decades of experience in varied sectors (banking, finance, consultancy etc.), Triptendu brings in the necessary strategic and operational mix required for start-up entities; especially a unique Agri-Tech startup like SafeU that is solely dedicated towards truly Sustainable Agriculture and tangible Climate Change Action.
- ii. He left his corporate career, having got fascinated by the relevance of IORF and the unique possibilities of its IRF Technology.
- iii. Over the last 5 years of his close association with IORF, he has been inspired to design appropriate business models for taking the R&D solutions of IORF to the respective areas where they are needed the most; through customized service offerings.
- iv. He is also a CII-certified Corporate Sustainability Assessor.
